Title:

Comments: [bull] This is the worst of government. The Forest Service admits this will "likely adversely affect" Northern Spotted Owl, Marbled Murrelet, and Bull Trout critical habitat. [bull] This scale of project (2,000 acres, 11+ miles of roads, multiple threatened species) requires a full Environmental Impact Statement, not just an EA. The Forest Service considered but rejected analyzing alternatives that would protect fire-regenerated stands. [bull] This affects the Dungeness municipal watershed and a river segment already listed as impaired for temperature. Sediment from roads and loss of riparian vegetation threatens water quality. [bull] This will become the biggest fight over forest land in a long time. We refuse to give in without a fight. Please be wise and cancel this project. [bull] Denise Andrews
