Comments: This plan which would protect corridor for the trails in the Mark Twain National Forest are so needed and wanted. My husband and I moved to our particular location with the number one priority having access to these beautiful trails. Some trails we have ridden were destroyed by clear cutting and ruined what had been an enjoyable trail ride with ugliness. For us and the many trail riders now and coming in the future, more needs to be done to protect these beautiful trails beauty we have now and long into the future.
