Comments: To the Forest Service,

I am in support of project #67600 to provide better protection from logging along the recreational trails. As an avid horseback trail rider, I appreciate the protection from logging/harvesting along trails. I have had to ride through areas where logging has taken place. After logging, there are always increased piles of brush and down tree limbs. I'm sure it is difficult to remove all the limb debris but it leaves an unsightly dystopian landscape, and I'm sure an increased hazard for forest fire. I would hope eventually that loggers would be responsible to clean up the limbs and debris left after logging to create a more attractive landscape and less fire risk but I'm not sure that will ever happen. So at least a protective corridor for the trail will be an improvement.

Thank you for considering this, Deedee Moore
