Comments: This is only a general "objection" and won't count as "legal" but I want to be on file as objecting and to express my concerns about the Midnight Project Final EA possibly enabling another Mission Project bad outcome : (. There's so much "wiggle room" in the Final EA that could bring uncertain outcomes. And to be honest, with the current Trump administration push to log and extract without consideration of resource impacts and outcomes and long term effects, the uncertainties for a bad outcome are very present.

Local decision-makers still have a say in actions taken, and I join with the voices of many others who ask Okanogan-Wenatchee NF and Methow Valley Ranger District to take responsibility for forest stewardship.
