Organization:

Title:

Comments: Thank you for the important opportunity to comment on this project. As an avid outdoorsman for six decades and a third generation Montanan, I feel the Greenhorn Project should not be considered an emergency and should benefit from full input from the public.

Also, motorized use and mountain bike use should be in designated areas only with enforcement of landscape degradation emphasized.

Vegetation management should include some commercial thinning in order to produce the best possible habitat for wildlife as well as a fire-resistant landscape. This should be the primary objective.
