Title:
Comments: I insist that the project stay entirely out of the habitat for the listed threatened species, especially their critical habitat.
Insist that no logging or road construction occur in roadless areas.
Ask that higher altitude forests not be logged: spruce/fir, bristlecone/limber pine, and lodgepole pine.
Ask that a much smaller project, focusing on protecting infrastructure, be considered instead of the one currently proposed.
Insist that the public be allowed to comment after the analysis of potential impacts has been conducted
