Title:

Comments: As always, CORE will remove trees with any part within 10 feet of our powerlines.

We also ask that you please do not leave trees standing that can strike our powerlines. The reason is that after thinning, the remaining trees now face more direct wind than they have adapted to withstand, making them more prone to failure and hitting our lines. At a minimum, we need to know when and where you are working around our lines so we can assess residual risk afterwards.

Thank you kindly,

CORE Electric Cooperative
