Title:

Comments: Do NOT betray G-D and become an irresponsible steward of the one and only planet that we get. This world is not designed for us to extract and pillage from for profit. These types of pristine environments are becoming more and more rare and the consequences of this continued destruction will lead to consequences beyond what humanity can begin to fathom. This goes beyond climate change. This is spiritual. If you have any faith at all in the existence of your soul do NOT allow this earth to become a hellish wasteland and do not allow yourself to be locked out and blocked paradise by proving that you cannot be a good person here and now. No temporary gains will make up for the unfathomable losses support for these types of projects will accrue.
