Title:

Comments: I do not approve of public lands projects being approved without adequate time for public comments. I also do not approve of clear cutting and herbicide use on grand scales as is planned for this project. This project gives every indication of being a logging industry grab of public resources, sold on a fraudulent basis and pushed through by deceptive process. I OPPOSE IT, AS A MEMBER OF THE STAKEHOLDER PUBLIC. I want to see public review, including public meetings where those favoring the project confront responsible opposition and with the press present to convey results to a wider audience. If there is not public review on a civil, intelligent, adult basis then it should be taken to the courts to halt the project completely until proper review can be achieved, AND "PROPER REVIEW" MEANS TAKING INTO ACCOUNT THE BEST SCIENCE ON FOREST MANAGEMENT, RISK REDUCTION, AND PROTECTION OF RESIDENTIAL AREAS. The best science should prevail, not the interests of loggers, not unless they are in accord with and in coordination with the best science and best land management practice.
