Comments: As an avid visitor and user of the South end of the Cherokee NF, I wholeheartedly support this project. The road improvements that I have seen on South Zone in the past few years are great and I am excited to see more. Prescribed fire is part of the natural landscape and cycle and is a great tool. I would like to see more access for hunters, ie. trying to plan projects with hunting seasons in mind. The hunters pay to use the forest, unlike the tourists who are in it for the price of a tank of gas. That being said, improvements to wildlife plots will be a welcome sight. Keep up the good work and stewardship of the forest.
