Comments: Thank you for taking public comments on the Caldor Fire Restoration Project Proposed Action. I read the proposal and the Draft Environmental Assessment, and I'm cool with all of it. More than cool. I'm grateful for it. I live in Christmas Valley and it's clear to me this valley would be a burned wasteland if not for the forest thinning that occurred before the Caldor Fire.

I would like to echo Nate Smith's remarks about being careful around native oaks, Beaver Dam Analogs, and planting a greater diversity of understory and mid-story native species in addition to the pines and aspens already planned.

Thanks again,
Kurt Frieden
