First name: Louise

Last name: Bullock

Organization:

Title:

Comments: I support this project since:

1. It would create a 100-foot timber-harvest buffer on both sides of the trail (except in specific cases like restoration, salvage, disease, or safety).
2. It updates the Forest Plan by removing outdated standards that didn't protect the trail corridor.
3. These protections will help safeguard the condition of the trail, making it more sustainable and easier to maintain for years to come.
