Comments: To whom it may concern,Some parts of the National Forest should just be left alone. Period stop. It should not be set up for'recreational use'. While you may feel you are helping the forest, there is no need to be invasive.This will in no way help the animals. That entire section should be left alone so that futuregenerations can see it as it is. We certainly do not need to be "logging" it under the guise of helpingthe forest.If I need to be present or say something in person please let me know.
