Comments: To whom it may concern:

I strongly oppose the proposed Granite Moccasin Project. While I support work to protect historical structures such as the Isaac Walton Inn and the Walton Ranger station, a project of this size is not necessary to achieve these goals and would permanently damage critical wilderness areas and harm bear and trout habitat. Furthermore, I strongly object to the use of an Emergency Action Determination for this project--a step that is clearly taken to limit public comment and critical review of the proposed logging project.
