Title:

Comments: I would like to make the following comments on the proposed Granite Moccasin Project logging project along the Middle Fork of the Flathead River.

Please take into account the following:

Do not log and build roads in the Pinnacle Creek watershed because of the likelihood of increased sediment yield to that creek.

Do not log and build roads in the Skyland area which also has a history of unstable soils, road slumps and culvert failures.

Please complete the Forest Plan amendment promised in 2022 to clarify what activities are allowed in the area the Plan recommends being added to the National Wilderness Preservation System.

Please prepare an in-depth draft Environmental Impact Statement and release it for comment with a 90 day window before finalizing it.
