Comments: I have been following this project attending a meeting in Tensleep. I appreciate the opportunity to comment again.

Yes safer parking is needed as is the road to Tensleep which WYDOT should prioritize over parking lots. Lets educate the rock climbers by putting curb stops so they will park as in a parking lot not taking three spots by setting diagonally. Also require them to attend a Tail Gate meeting at the Rock Climbers camp site to explain all this and have documentation to put on cars. If no documentation shown then a a warning and or ticket be imposed. Something similar to what a ranger provided me regarding bear proof cooler containing bottle water this fall while elk hunting. ATV,UTV, boat and snowmobilers are required to purchase a permit to be on the vehicle and that money goes back to help improve trails. Seems we should implement this program for them. I like seeing some areas closed off as you have done to us the ATV riders. As far as economic returns to the area it at this point I only see a little food money being spent as they staying in tents and have been seen bathing in the creeks and Tensleep splash pad. I think money would be better spent on existing highway improvements and a finish the boat ramp project at Meadowlark lake by installing a much need dock. My 80 year old father in law has to go from rock to rock to get in boat. Slipping and falling in to lake at one point. Thank you for the opportunity to address this.
