Comments: The White Mountains are a national treasure. When I was young I hiked there; now that I am old and disabled I want the current and future generations to enjoy its wilderness characteristics. Please do not accept the proposed Forest Plan amendment for the White Mountain National Forest. Instead, please analyze and create a trail monitoring report and then consider trail management options, including site-specific analysis, transparency, and a more informed commenting process. Conduct site-specific NEPA analysis for all new trails and trail relocation for anything considered outside of established trail corridors in Wilderness. Finally, new trail and trail relocation work should be completed using traditional skills and tools, rather than motorized and mechanized equipment. These practices should be followed in all Wilderness. Thank you.
