First name: Jim

Last name: Bjornemo

Organization:

Title:

Comments: Thank you for asking for public input,that's the best way to start. As vice-president of the Anaconda Sportsman club we have worked well with the forest service. We understand that small logging projects can be healthy for the land. Road improvement by putting in new culverts and grading by the logging companies go's a long way and helps. We found that winter logging help grasses regrow quickly. Please work with the public and use best science available.

Jim Bjornemo
