Comments: While the draft plan includes many positive steps, there are several important components where improvements will have better outcomes for both access and conservation:

Please provide transparency by defining clear criteria, timelines, and appeal processes.

Please apply science to climbing infrastructure decision making. Existing climbing routes should only be closed or removed if quantitative scientific methods display measurable impacts. Replace proposed blanket closures (Leigh Creek RNA, bats, raptors) with adaptive, science-based, and site-specific management.

Please clarify definitions and processes related to cultural resource protection. The plan needs to explain fully how Section 106 analyses and traditional cultural surveys will be implemented.
