Comments: I want to raise the following suggestions for this proposal:

Support transparency for new route permitting: Ask the Forest Service to define clear criteria, timelines, and appeal processes.

 Apply science to climbing infrastructure decision making: Existing climbing routes should only be closed or removed if quantitative scientific methods display measurable impacts. Replace proposed blanket closures (Leigh Creek RNA, bats, raptors) with adaptive, science-based, and site-specific management.

Clarify definitions and processes related to cultural resource protection: the plan needs to explain how Section 106 analyses and traditional cultural surveys will be implemented.
