Thank you for the opportunity to comment on the Environmental Assessment (EA) for Forestwide Thinning Analysis #68852 for Mount Baker-Snoqualmie National Forest.

Please issue an Environmental Impact Statement for the project to allow for an appropriately in-depth assessment of the project impacts and outcomes, as well as additional, more specific community feedback on project sub-areas.

Please also consider breaking the project into four distinct plans, based on district, so that environmental assessments can be tailored to the unique conditions of each jurisdiction[mdash]in line with other USFS planning processes and similar projects conducted in the PNW region.

Thank you for considering my comments.

Steve Wilson
