Comments: Dear Sir or Madame,

I respectfully agree with much of the concerns and remedies noted and applaud the re-wilding, tree management and the wildfire prevention tactics. However, I object strongly to the "clearcut" pieces as I did not see more details on the size of potential clearcut areas nor the total number of clearcut areas. In addition, my primary concern is not to provide jobs from artificial clearcutting especially when no details are provided. That said, please provide size, scope, placement, and total number of such clearcut areas. Until then, I do not support this program.

If no details is forthcoming, I only support the non-clearcutting parts. Thank you.
