Comments: Craven Canyon is a world-class cultural and historic site. It contains rock art and other artifacts that are more than 7,000 years old. Many artifacts and sites of interest have been found in and around the Canyon, where people gather for ceremony and study. The October Jinx project would involve 17 drill pads with drilling depths reaching 700 feet. Each drill site would use 5,000 to 10,000 gallons of water per day. Please preserve this special area
