Comments: I oppose the October Jinx Project #67625. Mining in Craven Canyon and the potential damage to cultural and historic artifacts and rock art is unacceptable. Any damage that may occur cannot be mitigated and repaired, therefore destroying them for future generations to view and enjoy.

The mining activities also pose an environmental threat to the areas water resources, which again cannot be remediated if polluted. The benefits do not outweigh the damage that can result.

Please deny this project's permit to explore and mine in this area.
