Title:

Comments: Hello,

This project should in no way be subjected to "Categorical Exclusions," the Trump-exploited tactic to cut the public out of decision-making and fast track public lands extraction.

The people of Vermont and New England deserve to have their questions answered about this project, especially when it comes to the potentially highly impactful logging, burning and herbicide applications involved in this project.

Please eliminate the "Categorical Exclusions" label from this project and subject it to the public-input process it warrants.

Thanks very much,

-Jared Pendak
