Comments: I'm writing to express my opposition to canceling the Herbert Glacier public use cabin. The Herbert Glacier cabin is a valuable recreational resource that provides safe, managed public access to an area that residents deeply value. I understand that there are existing and potential mining activities in the area, and that the Forest Service must balance multiple uses of public land. However, public recreation and mineral development do not need to be mutually exclusive. With clear boundaries, scheduling considerations, safety buffers, and ongoing coordination, it should be possible to protect public access while allowing responsible mining activity to continue.

Canceling the cabin removes public access rather than addressing coexistence through management solutions. I respectfully urge the Forest Service to explore alternatives that maintain the Herbert Glacier cabin while ensuring safety and operational needs for all users of the area. Thank you!
