Comments: I strongly oppose this project to burn and possibly use herbicides in this area of my national forest. I visit this area and would like to see it evolve however nature sees fit. It does not need any human intervention. Let wildfires burn rather than taking a torch to this area. Under NO circumstance should herbicides be used. We know they do harm to wildlife and humans alike, and for what reason here? Nature should decide even if we don't like the outcome.

Thank you.
