Comments: The New Amalga Mine next to the Herbert Glacier is a horrible idea and should be cancelled immediately.

This area is an important recreation area for Juneauites and people visiting Juneau.

The 4 mile bike/hike and ski trail was an important upgrade ~20 years ago and made visiting the glacier terminus more accessible.

Bring back the very popular idea of building a cabin near the glacier. Better siting could be found. Don't give up. Juneauites love recreating and going to these cabins especially in super scenic glacial valleys.
