Title:

Comments: Life long Alaska resident and senior citizen here.

I strongly oppose any pro-logging changes to the Tongass Forest Plan.

The planet has already lost too much of its environment to development.

We must protect what we have left.

Alaska's Indigenous people need to be listened to and culture respected.

However, corporations like SeAlaska, etc. are only out for profit and are in partnership with mining companies, etc. and should not have a voice on this issue.

Why do humans appreciate and visit Alaska? To see our natural wonders, to fish, to see wildlife, etc.

Destroy more of our forests and in time there will be no wonders to see.

We need to think of future generations and not the immediate monetary grab.

Politics will decide this, not science or public opinion. Can only hope for best.
