Title:

Comments: This plan is absolutely horrible and detrimental to the environment and the public. This is public land, it belongs to the people. No logging or any other activity should take place on public land where the only intent is to turn a profit for big corporations and the tyrannical government. Not a single member of the public wants this to take place. I call for the absolute preservation of ALL of our public lands. This is beyond unconstitutional and is vehemently evil. Do NOT let this administration and corporations allow this to happen. This is absolutely disgusting and there is no excuse for this area to be anything but preserved for future generations. This goes against everything that our public lands stand for and goes against every reason as to why our public lands were created!
