Comments: This is a fantastic idea. I live in the Farmer's corner area and that section of the bike path gets so busy in the summer. The thought of having a single track trail to connect to the Frisco trail. System makes so much sense. Having a connector trail in the winter for the high school kids is super helpful. The hut is a fun idea! I would say keep it small though, it doesn't need to be something big. Overall, I'm in full support! Let's do this! Great job to the Frisco Peninsula for constantly evolving and expanding.
