Comments: We should contemplate the long term prospect of future snow fall. Hopefully this year is an anomaly but what is the point of creating new Nordic trails if we do not have the needed snow for coverage on existing infrastructure till late in the season.

In regards to the proposed hut. I would oppose locating one on the peninsula. As a Frisco resident I feel it would take away from the bit of nature and escape from town the trails provide. There are other locations that would lend themselves better to a new hut.
