First name: Zipporah

Last name: Rice

Organization:

Title:

Comments: This letter is written with the intent to object to the intended South Revilla Integrated Resource Project #53477, as it will have a negative impact on the environment. The resulting environmental impact will be at the hands at the US Forest Service. The affected species of plant and wildlife's habitat will be forever endangered and obliterated when a choice to protect and preserve them could have been given. It is with great urgency and utmost importance that I ask that you and the members of your organization take action against allowing this to occur. You have the power and the authority to protect and preserve these species from harm and destruction as well as possible future danger and threat of extinction or extreme harm or devastation. Choose life and not death and destruction upon these plants and animals who we sho great pride in having part of our ecosystem here. I'm grateful for your service, support and commitment
