Comments: Without question the Forest Service must do a full Environmental Impact Statement for the October Jinx Project!!!! Why are we even considering allowing a foreign-owned company to destroy a world-class cultural and historic site? And why are we even considering allowing a foreign-owned company to use 5,000-10,000 gallons of water per DAY, impacting/threatening so many communities around the Black Hills including the tourist industry which is the LIVELIHOOD of so many in the area? This is not about bringing up the community and providing prosperity to the community!! This foreign-owned company is interested solely in profit-making and doesn't have to live with the consequences of toxic contamination of water and land.
