Title:

Comments: I am an Enrolled Oglala Lakota and I greatly oppose the proposed October Jinx Uranium Program because it will have a tremendous negative impact on the health of the land, vast ecosystems and water from which my family gathers our natural foods. The Black Hills are very much a part of who we are as Oglala Lakota/Indigenous people. We gather our foods like hazelnuts and a huge variety of mushrooms as well as plants from Craven Canyon area. Eliminating food sources is an act of genocide on us as Oglala Lakota/Indigenous people. Many of our natural foods that are not found on the reservation are found on our historical lands in the Black Hills.
