Comments: Don't rape the land. Tell this mining company NO. Don't mine in the sacred Pe'sla. For thousands of years Lakota people have prayed on this land which a Rapid City mining company wishes to extract graphite. Mining this land is a violation of treaty rights and would rip apart the constitution of the United States. It is disgrace that it's even being considered and a stain on humanity. Treaty's are the supreme law of the land - mining this land breaks this supreme law.

Greed will lose. The land will win, and will remain long after we're gone. Whether it's flourishing or surviving rape is up to you.
