Title:

Comments: Closures of these roads to the public during annual hunting seasons would cause not only an inconvenience but limit accessibility to individuals with physical challenges from being able to access areas for hunting recreation. Personal i have a brother with special needs, and a aging father. Not having access to a vehicle or means of transportation in a medical emergency would be a disservice to the hunters of oregon, especially with the growing rates of license and tag fees. Hunters are the back bone of this area and should be given means to access hunting locations.
