Comments: Logging old growth/mature forests will only cause massive long term damage to the immediate and surrounding biomes. It's scientifically proven that old growth/mature forests serve as a foundational resource for countless life forms. A plan to clear cut 5000 acres is nothing but a robbery of public lands by turning them into a wasteland. Stealing the ability for MULTIPLE GENERATIONS to every experience their majesty or benefit. For what? Short term profits for a logging company. This proposal is pathetic and short sighted. Do better.
