Comments: Habitat protection on the Flathead River is not something that can wait, and the Bob Marshall Wilderness Complex deserves immediate action in order to preserve the wild.

The Forest Service needs more scientific data informing user capacity numbers. In the interim, numbers need to be capped at levels that reflect the use at Wild and Scenic designation in 1976.

Immediate action is critical to address wildlife displacement in Wilderness caused by current recreation numbers. Immediate action is needed to reduce impacts to the Middle Fork of the Flathead caused by flights in and out of Schafer airstrip in the Great Bear Wilderness.

The vast majority of use on the wild rivers should be allocated to public use, and commercial outfitting and guiding should be limited to only the level that is "necessary and proper" as required by the Wilderness Act.

Data collection and analysis needs to include the entirety of the Flathead River corridor, a quarter mile on both sides of the river.

Immediate action is needed to bring the impacts along the South Fork of the Flathead into compliance with the area's Wilderness Management Plan and to protect bull trout.
