Comments: I urge you to please stop the movement of the South Revilla Integrated Resource Project #53477. It is so important to keep old growth forests intact, and not clear cut them for a short term profit and greed. The Tongass forest plays a crucial role in the health of Alaskas environment and provides important habitats for all kind of plants and wildlife. Alaskan natives and communities rely on the forest. We must think about the future and how we can preserve what is left for generations to come. Let's be on the right side of history.
