Comments: I am greatly concerned about this news! I am concerned that an Environmental Impact study has not be done to see how this will impact our fish, wild life and future for this amazing area. What is the major goal? Safety from fires or profit. What is the end goal? Thinning or harvesting our mature trees? More studies need to be done prior to this project raping our forests. Is this the beginning of profit management instead of managing our resoruces in a way that our grandchildren can enjoy the magnificent trails this area offers.
