Hello, I am a father and I ask you to please cancel this Austin timber sale.

My family and I want to see our stunning forests safeguarded and not destroyed for short-term gain.

The Forest Service is proposing over 35,000 acres of commercial logging as part of the Austin timber sale in the Malheur National Forest. The Austin sale includes logging of large trees, logging in mature and old forests, logging in streamside riparian forests, and reducing wildlife habitat and connectivity.

Please End this timber sale.

Have a good day.
