Comments: I am contacting you regarding the Austin project and the use of the "emergency" designation to avoid public input. Besides the obvious impact of such a large logging project on things like creating roads, erosion, watershed and climate, the area is crucial to wildlife migration. Please consider the wider, long term impact of this decision on the environment and it's flora and fauna, not just short term profits. We are truly at a critical point in how we impact our planet and your decisions have a significant impact. Thanks for being thoughtful.
