Comments: Please re-think the appropriateness of a "Hut" that only crowds an area that is currently seeing little use and zero overnight use. We need an EA and not a CE in order to study the impacts with more detail on wildlife, parking and the impact of a 8-10 person hut on the neighboring summer and winter trails. As someone who has visited many backcountry huts over the years, I just don't see the value of this hut other than just a way to make money. It will become a party hut due to the easy access. Parking right now in the summer is already an issue. Hut users should not be allowed to park anywhere but the base of the fun park.

I am also concerned with the two new trails proposed just west of the rec path. I can understand the value behind the summer trail since there are so many existing summer trails nearby and this will be a beautiful addition. But the winter skate ski trail seems unnecessary since not many folks skate ski on the bike path and that will be the only access. In addition a wide skate ski track will require a significant footprint especially on a hillside and this just seems not worth the impact on the land. Maybe design the summer trail so that it can be used by classic skiers as well.
