Dear Ms. Mathews,

Old growth protects so much more than just old trees. It protects the land and the animals and bugs that inhabit them. Please protect them, how they protect us from ourselves

Please conserve old growth and insure the health of the ecosystem they are so integral to.

United States

I want the Forest Service to clearly prioritize subsistence habitat, salmon production, climate resilience, and old-growth conservation in the Need for Change and throughout all alternatives evaluated in the Environmental Impact Statement.

Hannah Altshuler
