Title:

Comments: It is astonishingly ignorant to think you can manage a forest like a golf course. The destruction of habitat unbalances the ecosystem. Fires are part of any ecosystem. We are not talking about raking up leaves. Any zoologist or botanist with an ounce of intelligence understands that natural processes are complex. Keeping nature in balance and not threatening it with chemicals, mining, logging and removing biomass would be a good place to start. This proposal is asinine. Shame on the person whose name is on the bottom of the document. Resign in shame.
