Comments: Dear Erica Taecker, District Range

I strongly OPPOSE this project. I support the NO ACTION ALTERNATIVE. This project is part of a long list of logging projects that are being fast tracked behind the guise of wildfire risk mitigation. The EA identifies Spotted Owl Habitat that will be significantly impacted as a direct result of this project. The Spotted Owl is protected under the Endangered Species Act. So any disturbance of their habitat is ILLEGAL.

The USFS, USDA, and all other agencies are not above this law. So this project cannot move forward even with the so called "emergency authorization" that the current administration has signed. It is still ILLEGAL.

Again I STRONGLY OPPOSE this project in all of its entirety.

Sincerely,
a concerned legal US Citizen

Michelle Carfagno
