Comments: Hello,

I am writing to express my deep concern and opposition to the Black Pine Mining Project.

There is no need for an expansion, and it would further jeopardize the land in the surrounding areas - greatly impacting the ecosystem. This mining project is not in the interest of the working-class Idahoan. We would rather see our land protected and cared for so that we can continue to enjoy the place that we call home.

Please understand that once this land is mined, it will be forever altered and changed for the worse.
