Comments: Living in wildfire (add drought) area is concerning. The work done under Hillary Franz in the upper Nahahum area was critical in saving the neighborhood during last years fire. Was able to drive through it prior to Sugarloaf fire and thought the work exceptional. Plenty of clearing, yes - but much habitat, hydrology and "forest communities" which support wildlife was protected.

It's a hard job, and not getting easier under present federal administration. Sigh.

Thank you for continuing this important work - may the day return when you can be more local and hire back many of the folks who were laid off!
