Comments: To this project IDT; I forgot to comment on the proposed 2.9 miles of new temporary road. This would likely be very underestimated. Suggest the IDT re-look at this very small amount of of new constructed roads.

The project says these roads are temporary and would be rehabilitated. Okay. Refer to my previous comments about road review.. even new ones. Recommend a higher mileage. Whoever is implementing your project will not be effective if hands are tied due to an inadequate amount of new constructed roads need for timber harvesting, and possibly travel management connections of existing roads. Thank you for opportunity to comment. B. Ward
